Cajun Navy

Re: Disaster Case Managers

Dear Cajun Navy:

It has come to our attention that our faithful Disaster Case Managers will be leaving us after spending time with us on the ground in Pike County helping those recover from the Flood waters of Summer of 2022.

As the unmet team manager of Pike County Relief Services, I volunteer with and work shoulder to shoulder with these fine people with the Cajun Navy. They have been a crucial element in the workings of Pike County Relief Services. They not only have been a crucial element, but also faithful workers, dedicated workers, committed workers that we hate to lose in such a time as this.

With their great help, we have helped over 100 families gain a sense of normalcy in their livelihood within Pike County. With their great help, we have helped more than just flood survivors, we have helped those with unmet needs. I must admit, it would have been mighty difficult for us to help over 100 families without the monumental assistance of these Cajun Navy Case Managers! They have been amazing!

We are thankful to have helped so many in such a short amount of time; however, there remains open cases who still need new homes, new HVAC's, new hook-ups to City Water, homes that need private bridges, homes that needs leveling, homes that needs moved, homes that need painted, homeowners who need resources to get them back in a safe, sanitary housing, and who more . . . if you would consider extending our partnership with our Cajun Navy Team we could help even more people.

Together We Can Achieve More and with the Cajun Navy Team, they are no exception, they have proven themselves to be exceptional in their work ethic, in their communication with clients, in their communication with the Pike County Relief Service team, in their communication with key contacts that are vital to flood survivors and those with unmet needs.

Respectfully submitted,

Thomas Reid,

Your Unmet Needs Team Manager

Pike County Relief Services
